

SUPER GROUP A — APP + PEOPLE CONNECTION CONTEXT

This Markdown is scoped to **Super Group A** only.

Source scope used:

- Org roster rows where `Super Group = Super Group A`.
- App contact rows where `Super Group = Super Group A`.
- App contact roles may include people outside Super Group A because the application file includes support, specialist, expert, advisor, deal, and notification relationships.

Data notes:

- Names with `*` are preserved from the source tables. Treat `*` as a source marker/primary indicator unless your internal process defines it differently.
- Short lead values in the app file such as `Gomez`, `Jha`, `Naik`, `Palacios`, `Olvera`, `Ramirez`, `Barbour`, and `MS` were expanded where the match was clear.
- Blank source fields are left blank.

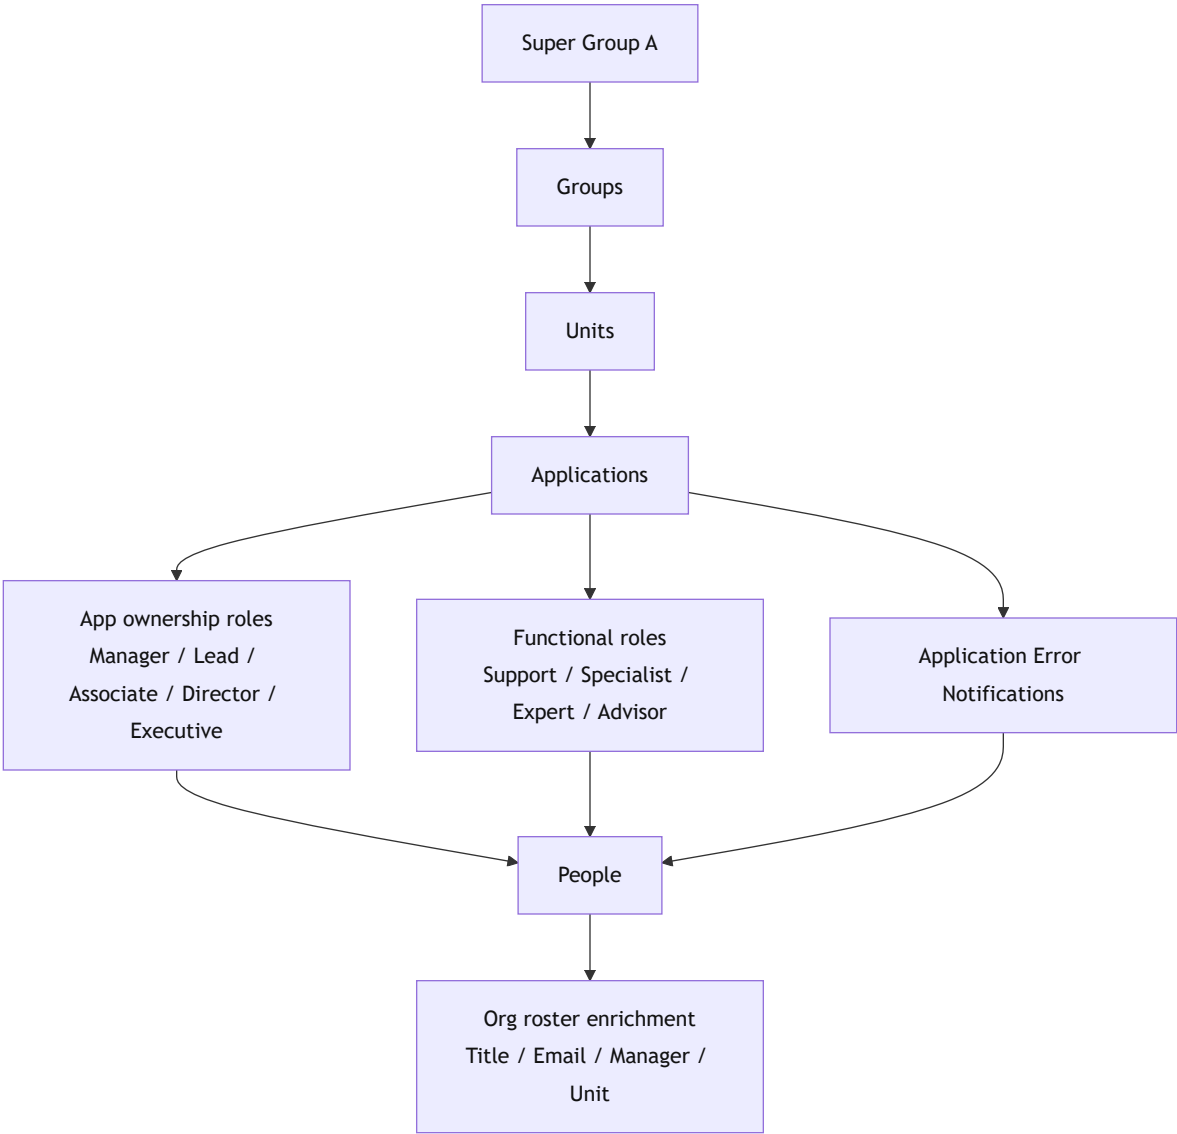

SUMMARY

Metric	Count
Super Group A org roster people	32
Super Group A applications	40
Groups represented by apps	4
Units represented by apps	6
Unique app-contact people across all roles	179
Unique app-contact people also in Super Group A roster	26

LUCIDCHART IMPORT EDGE MODEL

The companion CSV files in the package provide a Lucid-friendly graph model:

- `Super_Group_A_Lucid_Nodes.csv` — node records for Super Group, groups, units, apps, and people.
- `Super_Group_A_Lucid_Edges.csv` — app-to-person role edges with app metadata and roster enrichment.

Recommended Lucid import mapping:

Lucid concept	CSV field
Node label	Label
Node type/category	Type
Connector source	Source
Connector target	Target
Connector label	Relationship
Grouping/swimlane	Group or Unit

Sample edge rows:

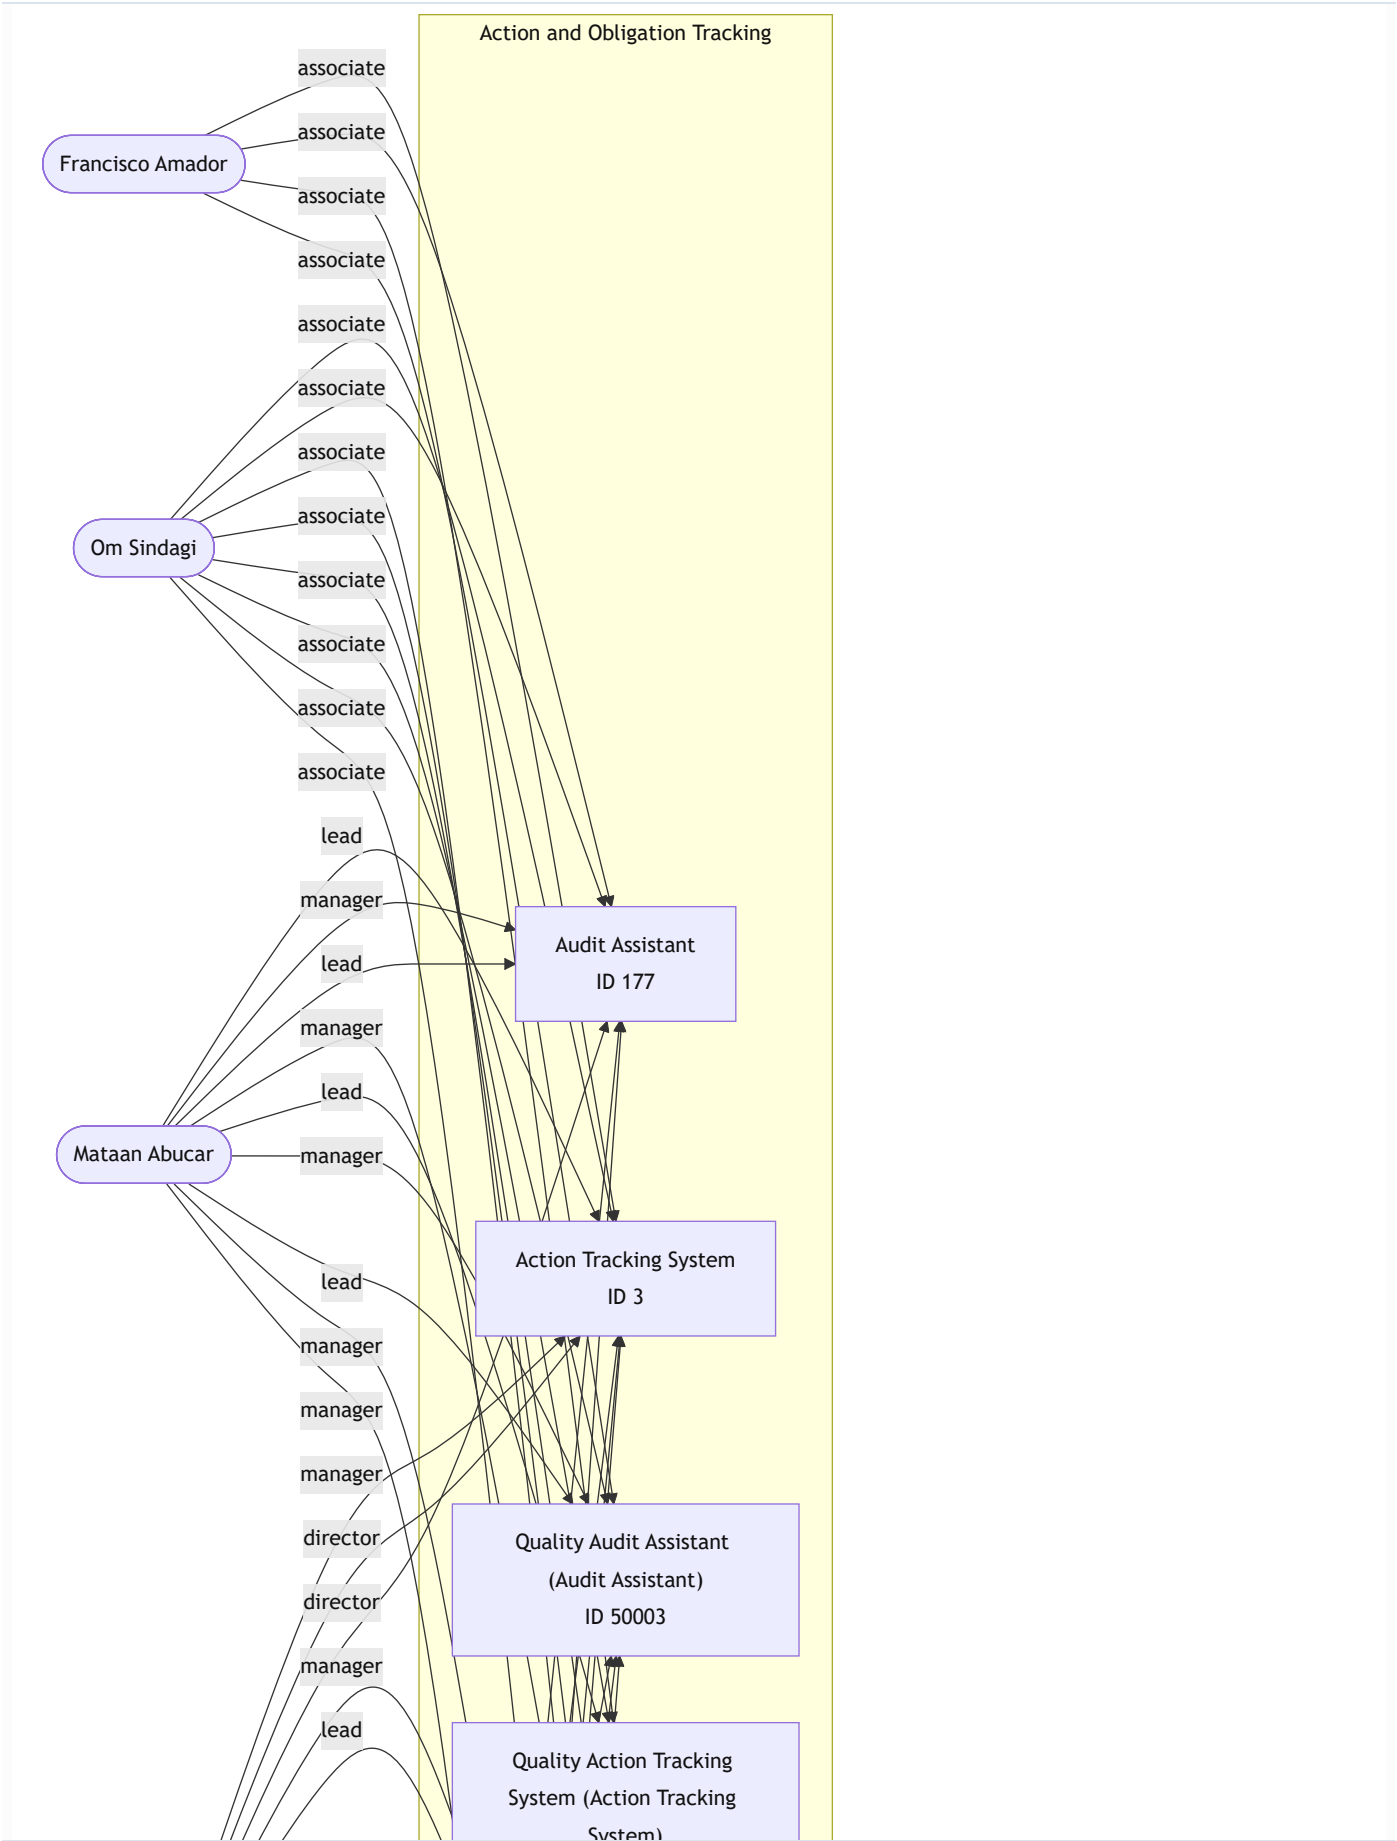

Application	Relationship	Person	In SG A roster	Group	Unit
